As the President of a company with offices in Baltimore, Washington, D.C. Rockville, and Chantilly (Northern Virginia), I spend a lot of time in my car, and a lot of that time is spent listening to XM Radio. I find it essential to access traffic and weather reports instantly! XM Radio allows me to do this.

The alternative is to tune to a commercial station, wait endlessly will listening to their music and nonsense talk, and then maybe get lucky and hear a sub-par report.

XM Radio and it's traffic and weather stations are great, and are significantly different and better than anything commercial radio offers.

And, I'd be willing to testify to this.

Thank you.
